

# Insurance run-off accounts explained, London

**Monday 1 July 2024, 14:00 to 17:00**

## Overview

A course for non-accountants and non-insurance accountants alike, from introductory to intermediate level, aiming to explain the key features in insurance run-off accounts.

## Target Audience

This session is suitable for those who work in accounts, finance, M&A, commutations, reserving, or produce Solvency II or other financial transactions. For anyone who has a passing interest, but several years in the legacy market, this would be an appropriate information source.

## Learning Outcomes

At the completion of this session delegates will be able to:

- Read a balance sheet and P&L account and be aware of the relevance of entries
- Utilise knowledge gained to work through the terminology used in the accounts
- Draw from the information how a run-off company is performing and how this information can aid valuation estimates.

All workshop trainers have many years' practical experience in their professional fields, and their real-life practical responses to some of the workshop's do's and don'ts will help every delegate. Biographies can be found on the event page of our website.

## Venue

America Square Conference Centre,  
1 America Square,  
17 Crosswall, London, EC3N 2LB
